

ORGANIC Tapioca Products

Delivering **SUSTAINABLE** Consumption through **ORGANIC** Starches

Nowadays, consumers have greatly grown interests in healthy well-being, so organic products are gaining important roles in the market and reported to outgrow 14% annually in the next few years. Keeping away from non-chemical sources in production, non-contaminated stimulants, and pesticides is always the first choice in consumers' minds. Undeniably, natural organic is the competitive advantage that encourages purchasing decision. SMS has established an **ORGANIC** product assortment with dedicated production process certified by international organic standards.

SMS offers organic starch solutions for food manufacturers to meet the demand and reach out to cover the growing organic segment. Organic products not only keep consumers safe from chemicals, growth hormones and pesticides but are also friendly to the environment. You can become part of the value chain with us delivering excellent starch profile along with wellness.
